

AC Series Pedestal Mount

Borrowing from the intuitive design of our AC and SD Series of Aerators, the AC Series Pedestal Mount offers a clean and unique all-in-one mounting alternative to the standard "pole in the ground" approach. This aeration accessory will leave any landscape or venue looking neat and finished with its wide array of useful features. The clever construction includes methods for concealing and controlling both the wiring and the tubing, which often get left awry on many installations.

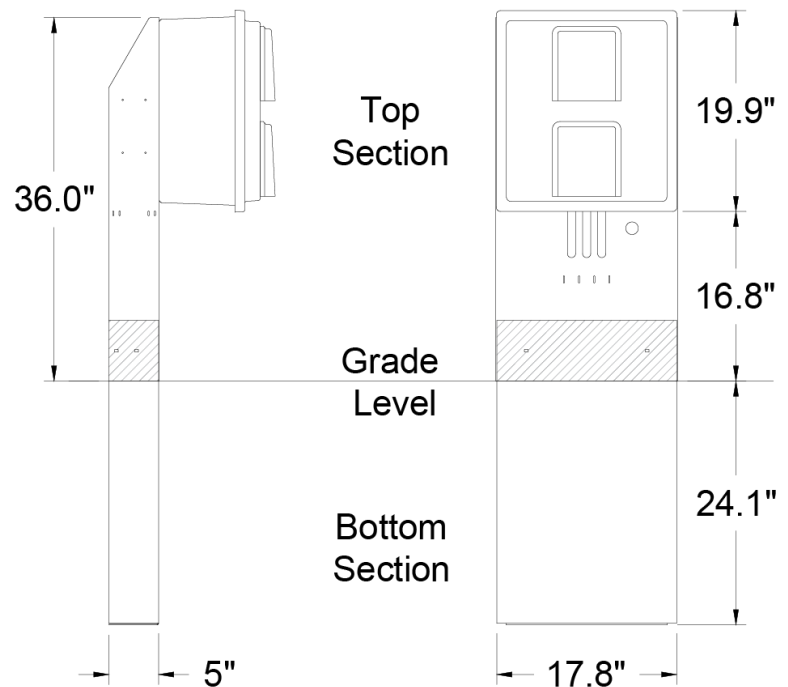

If you're looking for a better mounting solution for your aerator, you've come to the right place. Each unit comes ready to install, using only a few simple tools and a handful of bolts. As always, high quality materials and a rugged design ensure this is the perfect accessory to finish off any aeration system.

Pedestal Mount Features:

- No Concrete
- Powder Coated Finish
- Fast & Easy Installation
- Integrated GFI Mounting
- Sleek Design
- Conceals Hoses & Wires
